## Seam Sled

Seam Sled for Bond Turf-Lock Tapes

### An Essential Part of the Bond Turf Tape Seaming System

- Centrally aligns the turf tape with the iron under the seam
- Solid Teflon® provides a solid, smooth, and even foundation when working over rough or uneven surfaces like gravel and stone
- Keeps the iron at optimal temperatures to ensure complete melting of the turf tape adhesive even in cold and other adverse weather conditions
- Enables installer to easily press and tractor turf into the turf tape's melted adhesive for total penetration and optimal bonding strength
- Eliminates any distortion, and bumpy seams while keeping the base even.
- The seam sled helps prevent delaminating of the turf backing

**Indoor/Outdoor  
Versatility of the  
Bond Turf Tape  
Seaming System**

**Seam Sled System Components**

The seam sled consists of several components to choose from, depending upon the size of the seam.

- 3" or 6" Seam Sled
- 3" or 6" Bond Turf Tape - 50' roll
- 3" Back Seam Tape - 50' roll
- 3" or 6" High Temperature Seam Iron
- Bond Seam Roller
- Bondbilt Turf Binder
