# Bond Turf Tape

The fastest more durable way to seam artificial turf

## The Bond Advantage

With Bond's Turf Tape, you don't have to fumble around with messy pails of glue, trowels, and fabric. Simply roll Bond Turf Tape out, line it up, heat it with a high temperature iron, and lay the seam.

*Voilà! You're done!*

### Exceptional Versatility

Most hot melt seaming tapes used successfully by the carpet industry have been around for years. The only problem is that their use has been limited to indoor use under ideal conditions.

*Not so with Bond Turf Tape!*

It works even in adverse outdoor conditions, providing a strong and long-lasting bond on all urethane-backed artificial turfs.

## INDOOR/OUTDOOR VERSATILITY

### Other Reasons to Choose Bond Turf Tape over Traditional Glue:

- Ideal for all sports related artificial turf applications
- Simple to calculate amount of turf needed for project, saving time and money on possible shortages or excesses
- Not affected by high or low relative humidity
- Only requires a high temperature iron and turf tractor to install
- Environmentally friendly with no noxious fumes, makes Bond Turf Tape perfect for indoor applications where ventilation may be problematic
- Easier, cheaper, and safer to transport than traditional glue
